When you are done working the booth return your floor pass to the exhibitor registration desk, since we are limited to 64 passes total.

Housing: On-line at <http://www.ncsl.org/summit/registration.htm>

INFORMATION FOR BOOTH VOLUNTEERS

Below you will find information that will help make your participation an enjoyable event. Because this is an Alliance activity, individuals working in the booth are representing the profession and not their individual organizations. Some key points:

As you interact with legislators and their staff, remind them that the services they are experiencing are ones that pharmacists, in some states, are providing. If their state doesn't allow pharmacists to provide these or other patient care services, they should consider legislation to allow it to occur. One of the Alliance staff members can assist them with further information.

Stick to the messages in the folder that will be available on-site (if a legislator asks questions outside of those topics you can discuss it with them making it clear that you are not speaking for the Alliance. Please do not offer to discuss topics outside of the Alliance's agreed upon messages)

Make sure the booth participants know you are a pharmacist (or student pharmacist) Please bring a clean white lab coat and nametag (indicating you are a pharmacist, if available). If you have a stethoscope / blood pressure cuff bring those as well. You should wear business dress. (shirt/tie/dress/slacks under labcoat). We also have Alliance Buttons for booth volunteers.

Any teaching aids you would like to use should be cleared with one of the Alliance's pharmacist staff members.

Arrive early in case there is a line at the exhibitor registration desk (exhibits are in Hall A). Note: if you are on the first shift of the day, we have built in a preparation time into the schedule. You should proceed to the Exhibitor Registration Desk for the NCSL meeting to receive your floor pass. At the end of your time working the booth we ask that you return your badge so others will have access to the floor. We will provide a list of volunteers to the NCSL staff. If you have any problems or questions you can contact Brian Lawson at 202-429-7548.

When you arrive at the booth, check-in at the check-in station (we may need to get further info from you)

Make sure you recheck the schedule and assignments at the Alliance for Pharmaceutical Care website. We still need volunteers. Ask your colleagues if they could give some time to this important professional activity. They can send Brian Lawson an email at blawson@aphanet.org or [register on line](#).

Regarding assignments: based upon information provided, we assigned individuals to work various areas in the booth. Once we get on-site, we can make adjustments and give individuals various exposures if manpower allows.

Other screening area procedures will be explained on-site

At each area we will have an activity log sheet. Please use stick marks to indicate the number of patients you worked with during your shift.
