PROPOSED RESOLUTION FORM

Region #: 7

Proposing APhA-ASP Chapter: Oregon State University College of Pharmacy

Proposed Resolution Title/Topic:

Value-Based Reimbursement

Proposed wording (*desired action(s)*):

APhA-ASP encourages the pharmacy profession to work towards value-based reimbursement methods.

Background Statement (list reasons for the action(s) / pros and cons / references or resources):

The current most common pharmacy payment method is based on reimbursement for dispensing services without accounting for the clinical services that pharmacists provide. Pharmacists provide medication counseling and disease state management, optimize medication therapy, and improve patient adherence. New payment methods throughout the field are needed to support pharmacists' role as healthcare providers. The current method promotes quantity of prescriptions filled, while value-based reimbursement promotes quality of care. It is centered around patient outcomes and increasing access to care. Value-based reimbursements are calculated using data reported by providers (including adverse events, overall population health, hospital readmissions, etc.)¹. Patient adherence (and therefore outcomes) can be improved due to counseling provided by a pharmacist and can be used as data to calculate payment². This would give pharmacists incentive to provide the best possible counseling to patients. Overall, it would lead to pharmacists receiving reimbursements for all the services they provide, and prioritization of patient outcomes.
