

# GEORGIA'S PHARMACISTS

## IMPROVING THE HEALTH OF COMMUNITIES

Pharmacists are a valued member of the healthcare team and data shows that there is a need for pharmacist-provided patient care services. The potential impact of implementing programs that provide coverage for these services is great, improving health equity and access to care.

**Learn More!**

### QUALIFIED

#### Pharmacists are Highly Qualified Healthcare Providers

##### 6+ YEARS

Courses focused on pharmacotherapy, patient education, disease management, and clinical decision-making.

##### LICENSURE

Pharmacists take the North America Pharmacist Licensure Exam (NAPLEX) & Multistate Pharmacy Jurisprudence Examination (MPJE).

##### ADDITIONAL EDUCATION

Many pharmacists complete Post-Graduate Residencies, Fellowships, and/or Board Certification in specialty areas.

As of 2004, all pharmacy school graduates earn the PharmD degree...a doctorate degree to reflect the increased complexity of pharmacotherapy and advanced training required for adequate provision of patient care.

### ACCESSIBLE

#### Pharmacists are the Most Accessible Healthcare Professionals

**9,220**  
**Pharmacists**  
in Georgia<sup>1</sup>

**89%**

Americans live within 5 miles  
of a community pharmacy<sup>2</sup>

Annually, Americans visit  
their pharmacy  
**35 times**  
vs. 4 times  
at their primary care  
provider.<sup>3</sup>

Number of pharmacies is  
**15% higher**  
than number of  
provider's offices  
in communities where more than  
30% of households live in poverty.<sup>4</sup>

### TEST & TREAT

Pharmacists and pharmacies are increasingly offering this public health service of test and treat to promote prevention, early detection, and disease management. Patients are referred when appropriate.

- COVID
- Strep
- Flu
- RSV
- UTI
- STI
- H. pylori
- & others

**200%**  
increase

Since May 2020, there has been a 200% increase in the # of pharmacies with CLIA/point of care waivers in the U.S., leading to more pharmacist accessibility for patient care services.<sup>5</sup>

# PUBLIC HEALTH IMPACT

Approximately 50% of all adults in the U.S. have one or more chronic disease conditions <sup>6</sup>

Chronic conditions account for over 85% of total U.S. health care costs <sup>7</sup>

Saved for every \$1 spent on pharmacist service. <sup>8</sup>

## COVID-19

From February 2020 - November 2022, pharmacists in the U.S. provided more than

COVID-19 tests <sup>9</sup>

COVID-19 Vaccinations <sup>9</sup>

### Engaging Pharmacists & Their Teams

Expanding the number of pharmacies with test-and-treat sites in medically underserved areas could increase access to COVID-19 treatment

## INFLUENZA

Georgia pharmacists are providing flu shots

**TWICE**  
the hours offered for giving immunizations vs. provider's offices <sup>12</sup>

**2022 Flu Season**  
Pharmacies have given **18.7 Million** flu shots

**vs**  
**10.7 Million** given at provider's offices <sup>11</sup>

States now authorize pharmacists to directly prescribe antivirals based on a positive flu test. <sup>13</sup>

**Georgia pharmacists should be authorized to do this too!**

## OPIOID CRISIS

**80,000 Americans** died from an opioid overdose in 2021. <sup>14</sup>

**221**  
average deaths per day <sup>15</sup>

States, including Georgia, authorize pharmacists to administer naltrexone to patients. <sup>16</sup>

Naloxone access laws that grant pharmacists direct authority to prescribe are associated with significant reductions in fatal overdoses.

## HIV

Pharmacists have been identified by the CDC as key professionals in achieving one of the CDC's goals of ending the HIV Epidemic in the U.S. by preventing HIV infection.

States authorize pharmacists to directly prescribe PrEP. <sup>17</sup>

States authorize pharmacists to directly prescribe PEP. <sup>17</sup>
