Addressing the COVID-19 Crisis: An Open Forum Webinar Series for Pharmacists

September 17, 2020
Michael D. Hogue, PharmD, FAPhA, FNAP
Dean and Professor
Loma Linda University School of Pharmacy
President, APhA

Host and Moderator
Today’s Focus:

Discuss the HHS authorities for pharmacists for childhood and COVID-19 vaccines, the associated requirements, and the implications for your practice.
Rebecca P. Snead, RPh, FAPhA
Chief Executive Officer, Executive Vice President
National Alliance of State Pharmacy Associations (NASPA)

Guest Speaker
Ilisa BG Bernstein, PharmD, JD, FAPhA
Senior Vice President
Pharmacy Practice and Government Affairs
American Pharmacists Association

Speaker
Mitchel Rothholz, RPh, MBA
Chief of Governance & State Affiliates
American Pharmacists Association

Executive Director
American Pharmacists Association
Foundation

Speaker
Daniel Zlott, PharmD, BCOP
Senior Vice President
Education and Business Development
American Pharmacists Association

Subject Matter Expert: Q&A
Format for Today’s Webinar

1:00 pm: Introductions
1:05 pm: Presentation from Ilisa Bernstein
1:15 pm: Discussion with Ilisa Bernstein, Mitch Rothholz & Rebecca Snead
1:30 pm: Open Forum Q&A
1:55 pm: Wrap Up: Review of APhA’s Ongoing Activities and What’s Coming
Open Forum Ground Rules

- Use the **Questions** field on the GoToWebinar toolbar to submit comments and questions related to the topic discussion.

- Individuals whose submissions are selected will be asked by the moderator to state the comment or question for the audience. The line for the individual will be unmuted to read their comment or question.

- To maximize the number of questions/comments addressed, a **60-second time limit** will be in effect for everyone to state their question or comment.

- We will try to get to as many comments and questions as possible. We have created a new forum for COVID-19 discussions where further discussion post-webinar. Information on participating in this forum will be provided at the end of the open forum.
Presentation from Ilisa Bernstein

Discuss the HHS authorities for pharmacists for childhood and COVID-19 vaccines, the associated requirements, and the implications for your practice.
Pharmacists’ Authority to Immunize During COVID-19

• Childhood vaccines

• COVID-19 vaccine

• Authorized only during the public health emergency
• Preempts state laws that are a barrier to national implementation

Importance of Well Child Visits - Keeping Your Kids Healthy

It is important to get a personal primary care provider and to use the same practitioners as much as possible for your child's healthcare needs. The members of your child’s healthcare team that includes primary care providers, pharmacists and other healthcare professionals, are focused on the well-being of your child. A personal primary care provider:

- Helps you get care for your child
- Provides care when your child is sick
-Keeps track of your child's medical history as well as your family history
- Keeps track of your child’s medical services, such as immunizations (shots)
- Gives you important information about your child’s growth and development
- Refers your child to specialists when needed
- Helps to coordinate your child’s health needs

Well-child visits are important, even when children are healthy. Well-child visits will help to keep your child healthy. Your child’s primary care provider will evaluate your child’s general health, growth and development. Your child’s primary care provider will also give you information and give your child needed medical services, such as:

- Health exams
- Tests, such as vision, hearing and lab services
- Shots (vaccinations)
- Lead screening (children under 2 years or as needed for older children)
- Tracking growth and development
- Medical referrals to specialists, if needed

With the help of regular well-child visits, your child’s primary care provider can often detect and address health problems before they become more serious.

Your child’s primary care provider will review your child’s health and family history. Well-child visits will allow you and your child to know the primary care provider and they can get to know you and your child. They will also maintain your child’s medical record and coordinate care with other members of your child’s healthcare team, including your pharmacist.

[TEMPLATE — to be placed on pharmacy letterhead]

Date: xxx/xxx/202x

Dear Name of Patient:

You have taken an important step in protecting your child and your family from infectious disease through vaccination. Your pharmacist is an important part of your healthcare team and strives to collaborate with other providers to best meet your child’s individual healthcare needs. Just as your pharmacist provides important services related to your child’s medications and overall health, having a primary care provider is also important. A primary care provider oversees your child’s overall health and well-being.

As children develop, well-child visits with your child’s primary care provider offers a time to review and discuss each of the important aspects of your child’s physical, cognitive, emotional, and social development. A trusting, ongoing relationship with a primary care provider, ensures that your child’s health and medical needs will be identified and addressed. Your provider can assist in coordinating tests, checkups and follow-up care.

Ask your pharmacist for assistance in finding a primary care provider in your community if you do not currently have one.

Immunizations During COVID-19

HHS Expands COVID-19 Vaccine Access
HHS authorizes pharmacists to order and administer COVID-19 vaccines approved or licensed by FDA to all individuals age 2 or older.

Providing Immunizations

APhA Weekly Open Forum Webinar, PhlAi, PHiLu, Pharmacy Amidst COVID-19 (September 10)
Learn about recommendations for the upcoming influenza season, the implications of the COVID-19 pandemic and new approaches to immunization activities in your practice. (Video - Slides)

Well-Child Visit Templates: Tools to Meet HHS Requirement (September 9)
A Task Force on Pharmacal Engagement in State-Based COVID Vaccination comprising APhA, NASPA, and NCPA and state pharmacy association executives developed these tools for use by pharmacists to satisfy the requirement under the HHS Amendments authorizing pharmacists to administer childhood and COVID-19 vaccines. The latest HHS Amendment states: "the licensed pharmacist must, if the patient is 18 years of age or younger, inform the patient and the adult caregiver accompanying the patient of the importance of a well-child visit with a pediatrician or other licensed primary-care provider and refer patients as appropriate." Two tools are Word documents, so individuals may customize or add data.

APhA Know the Facts: Vaccination Basics: A Guide for Pharmacists Vaccinating During the COVID-19 Pandemic (July 8)
While scientists around the world work to develop a vaccine against the novel coronavirus (SARS-CoV-2), many pharmacists remain on the front line, providing essential patient care services during this public health crisis. In this vaccination guide, APhA offers key facts about vaccination, including recommendations for providers and considerations for patients.
Discussion with Ilisa Bernstein, Mitch Rothholz & Rebecca Snead

Discuss the HHS authorities for pharmacists for childhood and COVID-19 vaccines, the associated requirements, and the implications for your practice.
Polling Question

Do you feel confident in your knowledge and ability to order/prescribe COVID-19 vaccine as allowed under the HHS authority?

A. Yes
B. No
Polling Question

Do you feel confident in your knowledge and ability to order/prescribe childhood vaccine as allowed under the HHS authority?

A. Yes
B. No
Open Forum Discussion: Audience Reflections

Successes, Barriers, Opportunities
Review of APhA’s Ongoing Activities and What’s Coming
Sec. 2. Policy. (a) It is the policy of the United States that the Medicare program should not pay more for costly Part B or Part D prescription drugs or biological products than the most-favored-nation price.
It’s Game Time! Tell Congress Pharmacists Can Help Fight COVID-19 and Influenza!

• House leadership said this week that they will stay in session until a deal on a new coronavirus relief package is reached
• APhA is asking Congress to include payment for testing language be included in any legislation that is moving, including this COVID-response bill
• Your immediate participation will help spur conversation within Congress about the need for pharmacists’ provider status during the public health emergency.
• We need ALL of our representatives to advocate to Congressional leadership in both parties to ensure this receives the attention it – and our patients – deserve so it is included in the next legislative package!

To take action now, go to: https://actioncenter.pharmacist.com/campaign/coronavirus/

Learn how to help patients catch up on immunizations they may have missed as a result of the COVID-19 pandemic

**Click here to enroll!**

**Catch Up and Keep Up with Immunizations in the Era of COVID-19**

**Activity Preview**

Due to the declared national state of emergency during the COVID-19 pandemic, many children have missed vital doses in their recommended vaccination schedules. As regulations on obtaining childhood immunizations have loosened, we need to help our patients understand the importance of and pathway to catching up on missed immunizations. As pharmacists, we should refamiliarize ourselves with the vaccination schedule as well as strategies for catching up on missed immunizations. In this session pharmacists will learn how they can play an important role in assisting children and their parents in catching up on missed vaccinations that resulted from the COVID-19 pandemic.

**Learning Objectives**

At the completion of this application-based activity, participants will be able to:

- Summarize the recommended pediatric immunizations and the normal schedule for their administration.
- Discuss the pharmacist's role in identifying patients who may have missed immunizations secondary to COVID-19.
- Develop an action plan to assist patient caregivers to safely allow children to catch up on their immunization series because of COVID-19.

**Activity Type:** Application-based

**Target Audience:** Pharmacists

**Learning Level:** 2
